the modern contemporary way to make your bedroom furniture special.  
The options are endless; from the selection within our brochure to completely bespoke creations.

Our superior made-to-measure aluminium & wood framed Sliding Wardrobe Doors are, we believe, the highest quality available in the UK today.  
THAT IS WHY THEY COME WITH A 10 YEAR MANUFACTURER'S GUARANTEE.

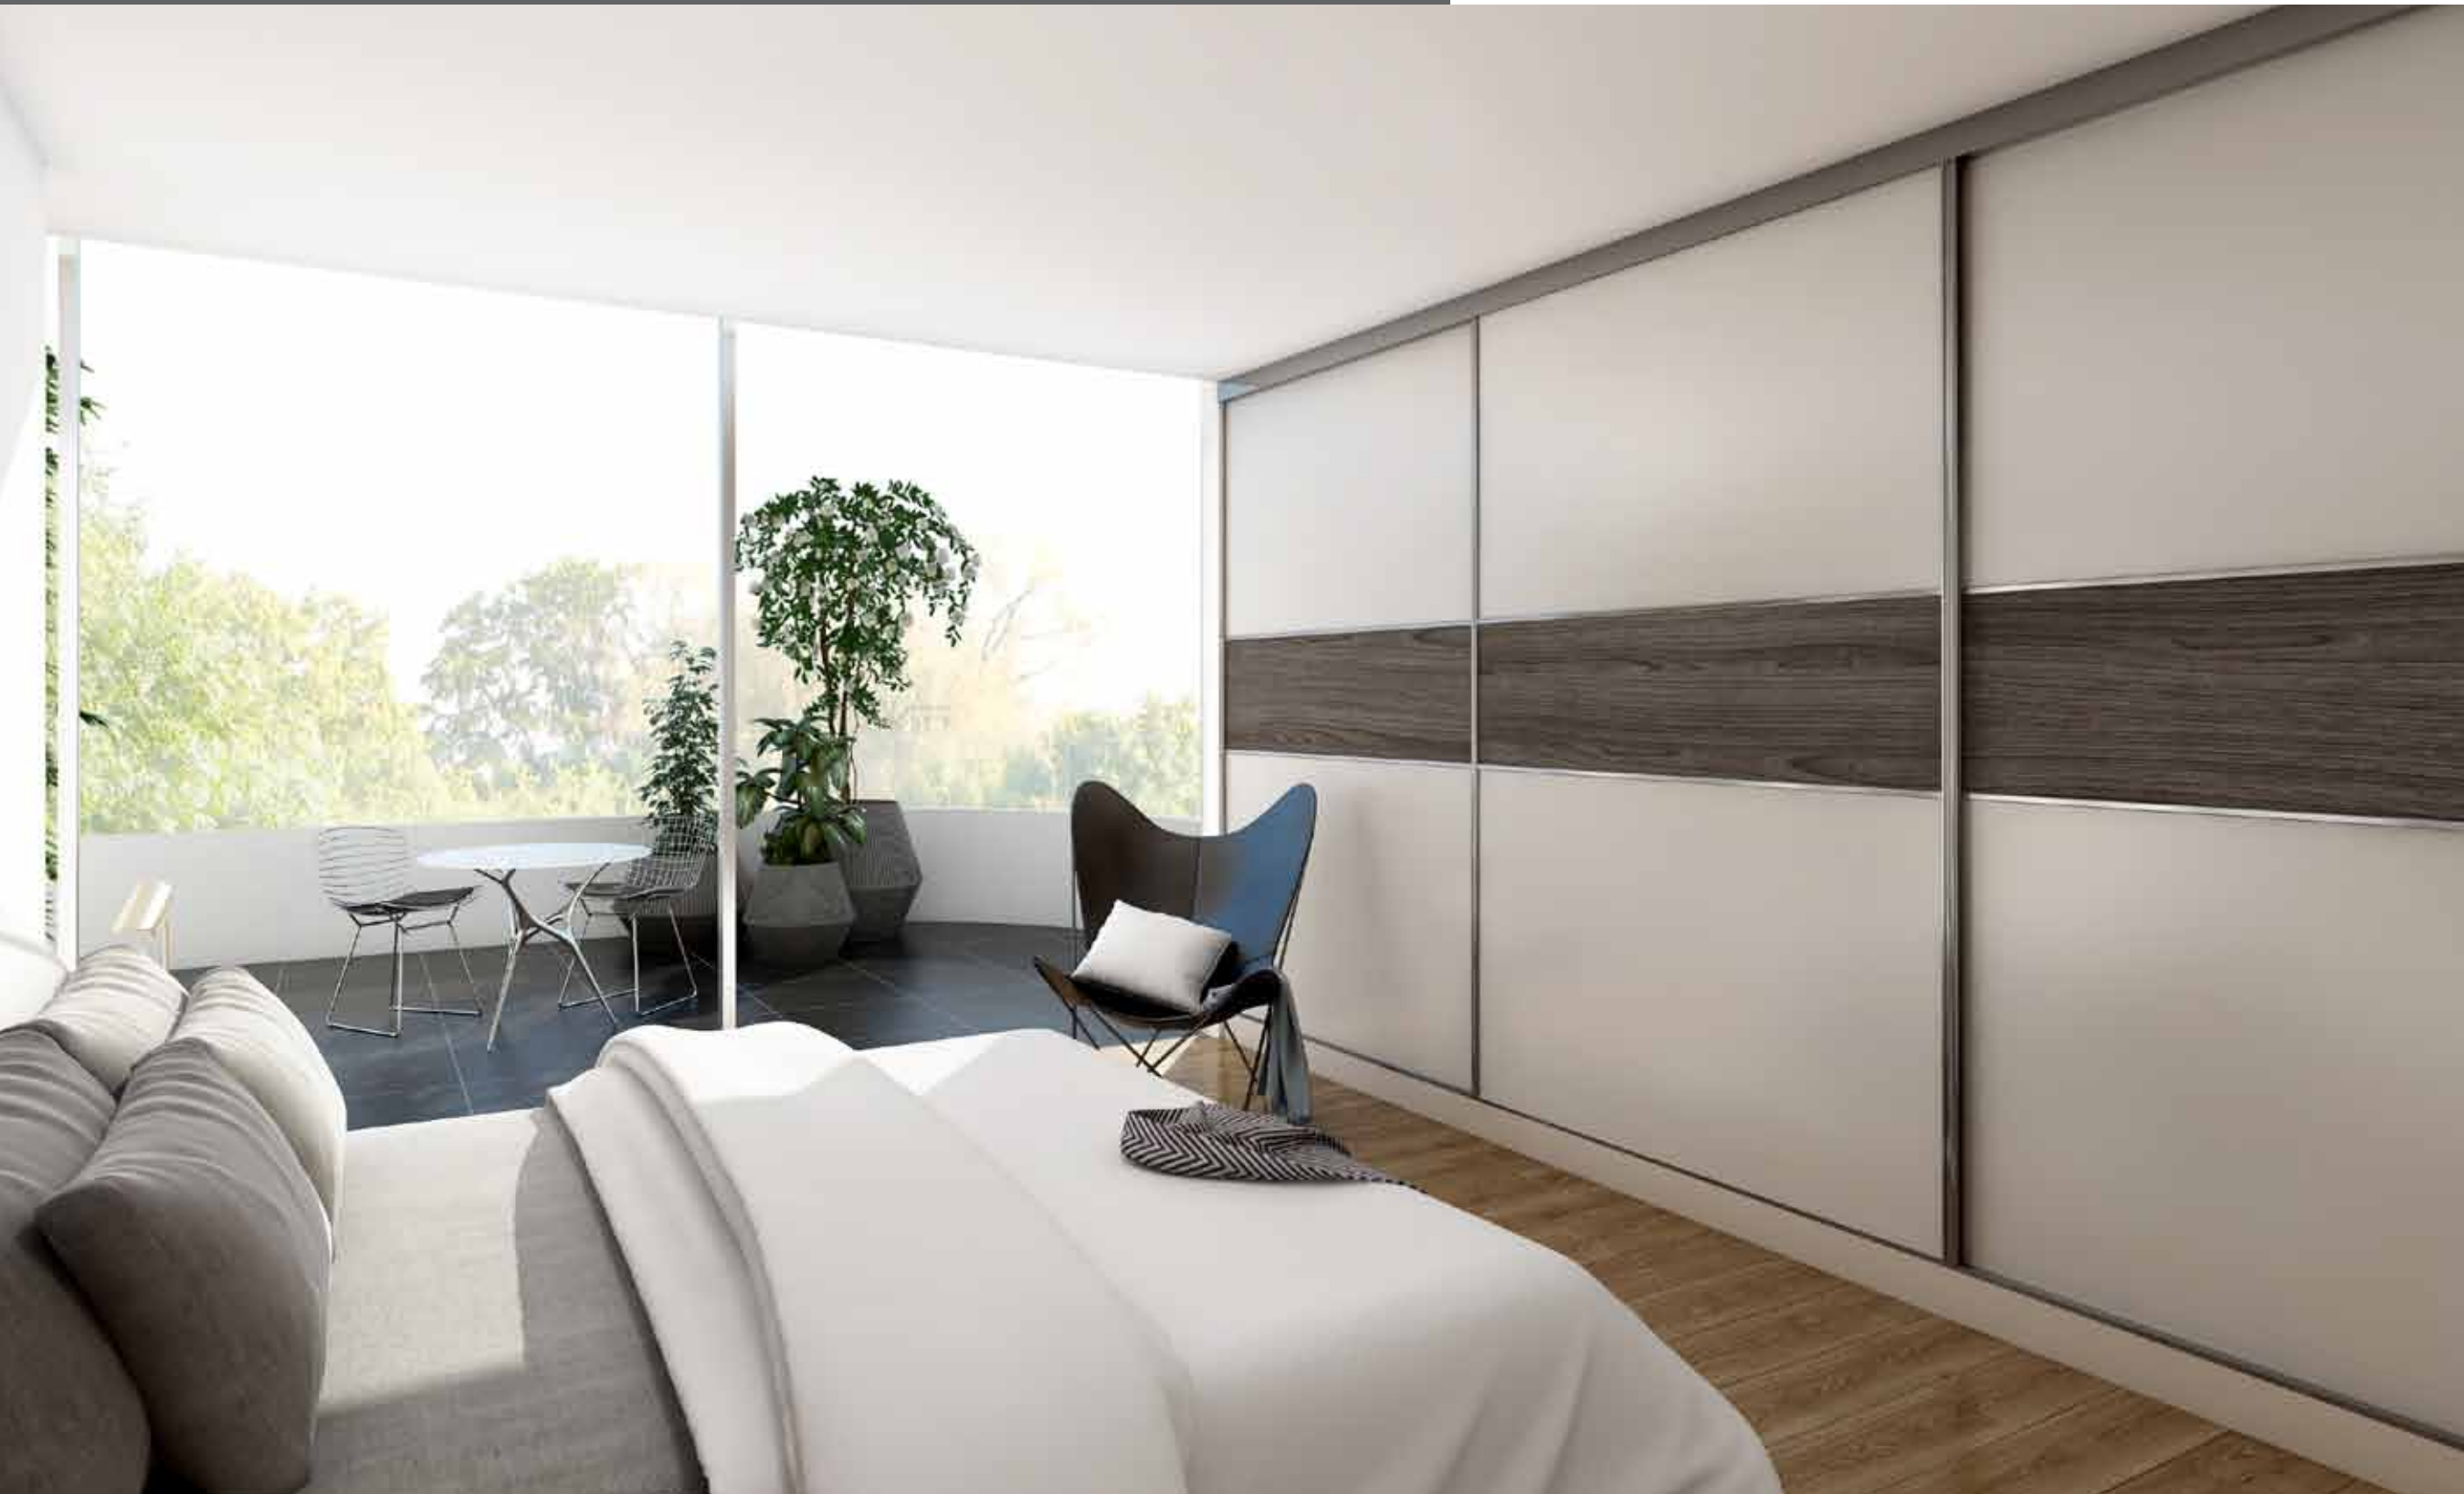

## OUR SLIDING DOOR FEATURES

- **Over 60 glass wardrobe door panel styles to choose from**  
We offer a wide choice of glass panels in plain & metallic finishes as well as 3 kinds of flat or bevelled mirrors.
- **Solid 18mm MFC panels from all major brands**  
As standard we offer a large range of solid MFC panels in multiple colours and finishes to match our bedroom furniture
- **Full palette of Egger, Kronospan, Pfleiderer & Unilin**  
There's nothing standard in our range of colours and board finishes as we have the FULL range from Egger, Kronospan, Pfleiderer & Unilin. Giving you almost limitless possibilities.
- **Doors can have multiple tracks**  
Our sliding door systems are normally supplied with 2 tracks, however they can have 3 or 4 tracks, enabling multi-door systems to all be pushed to one end of the opening, giving a much wider access. This is particularly useful for room dividers - and all our frames are designed to accept the same quality finishes to the both the fronts and backs.
- **Sloping ceilings and cut-off corners easily accommodated**  
We can supply sliding doors to fit under sloping ceilings in loft conversions and doors with corners cut off to fit under stairs etc. For safety reasons the angled section of the doors are only available in a wood finish - no glass angles.
- **Total flexibility for endless design possibilities**  
We offer enormous flexibility with size, style and materials, and if you want something even more special we can create amazing off-piste variations with the special finishes, vertical dividers, etc. Just call us, we're always up for the challenge

*...the possibilities are endless.*

## Torino

## Tuscany & Florence

all frames have matching mid-rails and top & bottom tracks  
frames can also be powder-coated to a required colour

# Heritage Wood Frame

Heritage Sliding Doors are a unique addition to our sliding door portfolio, perfectly balancing a prestigious look with quality design and engineering.

Heritage Sliding Doors can be manufactured using Egger, Kronospan, Pfleiderer, Xylocleaf and Unilin boards, in either textured or matt finishes.

The Heritage Sliding door is 36mm deep, available up to 1070mm wide and has our soft-close system fitted as standard.

This chunky, Shaker-Style, frame is available with a mixture of centre panels in either complimentary board colours, mirrors or coloured glass.

Heritage Sliding Doors can be manufactured as full frame doors, or with multiple horizontal dividers to give a contemporary finish.

A truly magnificent door in every way

## TECHNICAL SPECIFICATIONS

- **Made to measure using the latest computer controlled machinery**  
Our sliding doors are manufactured using computer controlled machinery for accuracy to any size and any configuration.
- **Constructed from the highest quality materials**  
Our sliding doors are constructed using the highest quality materials: 16 gauge thick (1.626mm) extruded aluminium frames, certified safety glass and mirrors and 18mm MFC panels. This combination ensures our doors do not rattle, flex or whip and, more importantly the quality is evident just by the feel.
- **Silky smooth, long lasting wheels**  
The substantial weight of our doors is taken on moulded wheels with integral well proven ball bearings. These are filled with anti-rust lubricant and incorporate a contact shield to prevent any dirt or dust ingress thereby ensuring a lifetime of silky smooth operation.
- **Anti-jump safety mechanism**  
All doors incorporate an anti-jump safety mechanism as standard.
- **Smooth gliding quiet running top rollers**  
In all frames except Florence the doors utilise twin ball bearing rollers with soft rubber surrounds in the top tracks to ensure a smooth glide and almost silent running.
- **Soft-Close options**  
Soft closers guarantee a quiet controlled close and are available on all sliding door frames. Additionally an integral full-length rubber cushion on the edge of the doors is featured on all our curved frames.
